

Math 2-5: Measurement and Data: Geometric Measurement and Problem Solving

Angle Measurement

Students	Learning Continuum Statements:
----------	--------------------------------

Students:	
------------------	--

RIT 161-170:

- Measures right angles using a protractor

Students:	
------------------	--

RIT 171-180:

- *No skills listed*

Students:	
------------------	--

RIT 181-190:

- Compares angle measures to benchmark angles
- Solves one-step word problems involving angles

Students:	
------------------	--

RIT 191-200:

- Compares angle measures to benchmark angles
- Identifies/estimates angle measures
- Solves one-step word problems involving angles

Students:	
------------------	--

RIT 201-210:

- Compares angle measures to benchmark angles
- Identifies/estimates angle measures
- Solves one-step word problems involving angles

Students:	
------------------	--

RIT 211-220:

- Compares angle measures to benchmark angles
- Identifies/estimates angle measures
- Measures non-right angles using a protractor
- Solves one-step word problems involving angles

Students:	
------------------	--

RIT 221-230:

- Identifies/estimates angle measures
- Knows the definition of an angle
- Measures non-right angles using a protractor
- Solves one-step word problems involving angles
