

Math 2-5: Operations and Algebraic Thinking: Analyze Patterns and Relationships

Whole Numbers: Concepts/Properties

Students Learning Continuum Statements:

Students:

RIT 191-200:

- Identifies factors of numbers less than 100

Students:

RIT 201-210:

- Identifies factors of numbers less than 100

Students:

RIT 211-220:

- Determines greatest common factors
- Identifies factors of numbers less than 100
- Solves real-world problems involving the least common multiple

Students:

RIT 221-230:

- Determines common factors
- Identifies factors of numbers less than 100
- Identifies prime and composite numbers
- Solves real-world problems involving the least common multiple

Students:

RIT 231-240:

- Solves real-world problems involving the least common multiple

Students:

RIT 241-250:

- Determines least common multiples
- Solves real-world problems involving common multiples
- Solves real-world problems involving the least common multiple

Students:

RIT 251-260:

- Solves real-world problems involving common multiples
- Solves real-world problems involving the least common multiple
