

Math 2-5: Operations and Algebraic Thinking: Represent and Solve Problems

Whole Numbers and Decimals: Rounding/Estimation

Students

Learning Continuum Statements:

Students:

RIT 171-180:

- Estimates solutions to multi-step word problems involving the four operations with whole numbers

Students:

RIT 181-190:

- Estimates solutions to multi-step word problems involving the four operations with whole numbers

Students:

RIT 191-200:

- Estimates solutions to multi-step word problems involving the four operations with whole numbers
- Estimates solutions to one-step word problems involving any of the four operations with whole numbers

Students:

RIT 201-210:

- Estimates solutions to multi-step word problems involving the four operations with whole numbers
- Estimates solutions to one-step word problems involving any of the four operations with whole numbers

Students:

RIT 211-220:

- Estimates solutions to multi-step word problems involving the four operations with whole numbers
- Estimates solutions to one-step word problems involving any of the four operations with whole numbers

Students:

RIT 221-230:

- Estimates solutions to multi-step word problems involving the four operations with whole numbers
